

Birla Institute of Technology & Science, Pilani, K. K. BIRLA Goa Campus
Computer Programming (CS F111)
Second Semester 2017-2018
Lab-8 (Strings)
PreLab Exercise (Evaluative)

Question #1

Write a C program to simulate the cut operation of text editor.

Store the following paragraph in a double dimensional character array. Take input using scanf (with delimiter as '\n'). [you are not allowed to use additional array]

Freedom and Liberty is priceless.

Our brave soldiers are doing their duties efficiently.

Whatever way you choose to celebrate this Day, it is important to think about honesty, national spirit, and spirit of the general good.

We should do our bit to preserve our freedom and the freedom of all.

It should never pass by just like another normal day.

Cut: read a string from the user. Display updated paragraph after removing all occurrences of the string

Sample input:

Enter a string to be cut: our

Output:

Freedom and Liberty is priceless.

brave soldiers are doing their duties efficiently.

Whatever way you choose to celebrate this Day, it is important to think about honesty, national spirit, and spirit of the general good.

We should do bit to preserve freedom and the freedom of all.

It should never pass by just like another normal day.

Sample input

Enter a string: the

Freedom and Liberty is priceless.

Our brave soldiers are doing ir duties efficiently.

Whatever way you choose to celebrate this Day, it is important to think about honesty, national spirit, and spirit of general good.

We should do our bit to preserve our freedom and freedom of all.

It should never pass by just like anor normal day.
